QUIZ-2

Question1: Your task is to write an efficient map-reduce code to find the maximum temperature of each year. The input file is now in the following format:

date, temperature-reading

Input file snippet

12-4-2018, 12

6-9-2008, 1

1-1-2007, -2

2-1-2008, 5

12-2-2008, 12

...

Class Mapper

Hint: declare associative arrays here

tempArray <- new Array // an array to store temperature for different years

% method Map (string file-id, string line) // map function gets one line from the input file at a time
