

Project Submission Guidelines

For your project submission, ensure the following:

1. GitHub Repository Link:

- Share the link to your GitHub repository containing the complete project.

2. Fulfillment of Proposal Features:

- Verify that all the features mentioned in your project proposal are implemented as per the agreed-upon scope.

3. Commit History:

- **Commits made after the submission date will not be considered during evaluation.**
- Each team member's contributions will be evaluated individually through the commit history in the repository.
- Ensure commits are meaningful and demonstrate your individual work.

4. Evaluation Criteria:

- Individual marks will be assigned based on the quality, frequency, and significance of contributions in the GitHub repository.

Make sure your repository is well-documented with:

- A clear README explaining how to set up and use the project.
- Any necessary instructions for testing the features.
- Comments in the code to explain complex logic.

Incomplete or undocumented submissions may result in a penalty.
