

National University of Computer and Emerging Sciences

Assignment #1

for

Web Programming

Course Instructor	Ms. Mahhek Khan
-------------------	-----------------

Department of Computer Science

FAST-NU, Lahore, Pakistan

Total Marks: 50

***Note:** Any form of plagiarism or direct copying of code will result in an automatic **zero** for the assignment. Cheating, sharing code, or using AI Generated Code is strictly prohibited. Ensure that your work is original and adheres to academic integrity standards.

For any queries related to the assignment, you can contact the TA via email provided on Google Classroom

Question 1 (25 Marks)

CV Generator Form

Design and implement a web page that allows users to input their details to generate a CV dynamically. The user must fill in the following details:

- Full Name
- Experience
- CGPA
- Education
- About (Short Bio)
- Contact Information
- Skills (Can be multiple entries)
- Address

Requirements:

1. The input fields should be well-styled and aligned.
 2. When the user presses the submit button, the entered details should be displayed in a portrait rectangle below the form, resembling a CV format (acting as a digital paper).
 3. The design and presentation of the generated CV should be visually appealing. (Higher design quality = Higher grades)
 4. Use Bootstrap for styling (*Can use simple CSS too*).
 5. JavaScript should be used to dynamically update the displayed CV upon submission without refreshing the page.
 6. The form should have validation to ensure all fields are filled before submission.
-

Question 2 (25 Marks)

Movie Showcase Website

Develop a webpage that displays different movies with their details. The movies should be shown as **cards** containing:

- Thumbnail Image
- Movie Name
- Rating

Requirements:

1. Design an appealing movie card layout using HTML, CSS, and Bootstrap.
 2. At least **five** different movies should be displayed.
 3. The cards should be responsive and aligned properly.
 4. The data can be **static** (manually added) OR fetched dynamically from a movie API (like OMDB API or TMDB API) for **bonus marks**.
 5. When hovering on a card, a pop up window should be shown that shows other details related to that specific movie (Be creative).
 6. Using REST API will earn extra marks but is **not mandatory**.
-

Submission Guidelines:

- Submit separate files for each question in the format (21L-XXXX-Q1). If there are multiple files for a question, you can add a suffix (21L-XXXX-Q1a, 21L-XXXX-Q1b).
 - API keys (if used) should be mentioned in comments.
 - The code should be properly commented and structured for better understanding.
-

Allowed Technologies: HTML, CSS, JavaScript, Bootstrap, REST API

----- Good Luck! -----
