

Explanation	Correct Response	Marks (Total 10)
Writing the correct formula for intercept calculation	$a = \frac{(\sum y)(\sum x^2) - (\sum x)(\sum xy)}{n(\sum x^2) - (\sum x)^2}$	1
Writing the correct formula for gradient calculation	$b = \frac{n(\sum xy) - (\sum x)(\sum y)}{n(\sum x^2) - (\sum x)^2}$	1
Using formula for 'a' to correctly calculate the intercept	$a = 9.181$	3
Using formula for 'b' to correctly calculate the gradient	$b = 4.8$	3
Using both the intercept and gradient to calculate the final answer for x = 4 using the equation y = bx + a	$y = 28.381$	2
