1. **What is Azure Container Registry (ACR) primarily used for?**
 - A. Hosting virtual machines
 - B. **Storing container images**
 - C. Managing Azure subscriptions
 - D. Monitoring application performance

2. **Which of the following container image formats does ACR support?**
 - A. VHD
 - B. ISO
 - C. **Docker**
 - D. TAR

3. **What is the default SKU when creating an Azure Container Registry?**
 - A. Basic
 - B. **Standard**
 - C. Premium
 - D. Free

(Everyone will get 1 point for this)

4. **Which ACR SKU supports geo-replication?**
 - A. Basic
 - B. Standard
 - C. **Premium**
 - D. All SKUs

5. **Encryption-at-rest feature is available in the following ACR SKUs?**
 - A. Basic
 - B. Standard

Name:

Roll Number:

***** SELECT ALL POSSIBLE ANSWERS. DO YOUR OWN WORK. DO NOT LOOK AROUND *****

C. Premium

D. **All of the above**

6. Which Azure service is commonly used to build and push images to ACR?

A. **Azure DevOps**

B. Azure Functions

C. Azure Pipelines

7. What is the purpose of ACR Tasks?

A. Monitor container health

B. **Automate image builds and updates**

C. Manage Kubernetes clusters

D. Encrypt container images

8. Premium ACR SKU allows you to recover images and tags after deletion (True/**False**)

9. Similar to Azure App Services, you can configure ACRs to either serve windows or Linux container images. (**True**/False)

10. Webhooks are available in the following ACR SKUs:

A. Basic

B. Standard

C. Premium

D. **All SKUs**

11. What feature allows ACR to replicate images across multiple Azure regions?

A. Image mirroring

B. **Geo-replication**

C. Multi-zone deployment

Name:

***** SELECT ALL POSSIBLE ANSWERS. DO YOUR OWN WORK. DO NOT LOOK AROUND *****

D. Cross-region sync

12. Which command lists all repositories in an ACR?

- A. **az acr list**
- B. az acr repository list
- C. az acr show
- D. az acr repo show

13. Scalable orchestration systems

- A. Docker
- B. **Kubernetes**
- C. Dockerfile
- D. **Docker Swarm**
- E. **DC/OS**

14. Which ACR SKU supports private endpoints?

- A. Basic
- B. Standard
- C. **Premium**
- D. All SKUs

15. ACR can save image related content such as Helm Charts as well as any image build using the OCI Image Format Specifications (True/False)

16. Which of the following can be used in DevOps to trigger a docker image rebuild ?

- A. **Git commit**
- B. **Base image update**
- C. **Manual trigger**

Name:

***** SELECT ALL POSSIBLE ANSWERS. DO YOUR OWN WORK. DO NOT LOOK AROUND *****

D. **Azure Monitor alert**

17.What is the purpose of ACR Helm Charts support?

- A. Store Kubernetes manifests
- B. **Store and manage Helm chart packages**
- C. Monitor Helm deployments
- D. Convert Dockerfiles to Helm

18.How can you restrict access to an ACR?

- A. By using NSGs
- B. **By enabling firewall rules and private endpoints**
- C. By disabling HTTPS
- D. By using Azure Monitor

19.What is the benefit of using managed identities with ACR?

- A. Faster image builds
- B. **Simplified authentication without credentials**
- C. Lower cost
- D. Enhanced logging

20.Which Azure service can directly pull images from ACR without authentication setup if in the same tenant?

- A. Azure App Service
- B. **Azure Kubernetes Service (AKS)**
- C. Azure Functions
- D. Azure Logic Apps

21. Existing Images can be updated in ACR using DevOps CI/CD pipelines (True/False)

22. ACR is open-source implementation of Docker container registry 2.0 (True/False)
